

# Create a Storybook Diorama

## **What you will need:**

Container for your Diorama

Paper

Glue or Tape (you can even use string)

## **Step One: Create a Base**

You can use any box you can find. Shoeboxes work great, but any box that can stand on its side with one opening will do. You could even use a plastic tupperware container if you have an old one that is not being used.

## **Step Two: Create a Background**

Grab some colored paper and get creative. You can draw your background and cut it out, or use different colors to create your landscape, for example green for grass, blue for sky or water.

## **Step Three: Make and Place Your Figures**

You can draw your characters and cut them out and paste them down or you can print them off of the computer and cut them out. You may even want to find little plastic figures that would fit into your diorama. You can hang them from the top or attach them to the sides.
